Risk-Reward

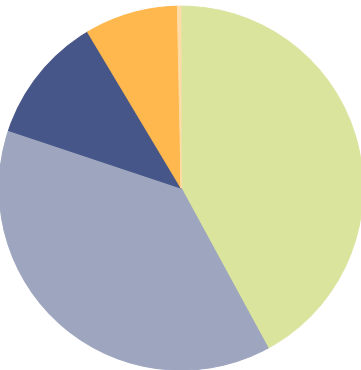

- We base decisions on fundamental credit driven research that supports our long-term secular views and investment themes.
- We believe credit is the best indicator for the direction of interest rates, which in turn drives asset prices.
- We seek to identify long-term global trends and invest in asset classes we feel will appreciate as these trends unfold. We invest in other positions over shorter cycles when conditions are favorable.
- We choose Funds that we expect to best express these views, focusing on the underlying holdings and exposure of each Fund and its liquidity.
