Risk-Reward

Long term secular view of global trends and opportunities Multi-Year Horizon

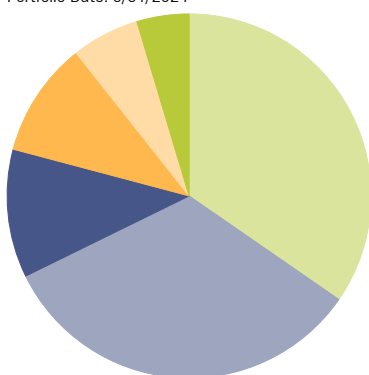

We focus on credit, value and macro analysis 6 – 24 Months

We review risk, positions, and opportunities monthly

- We base decisions on fundamental credit driven research that supports our long-term secular views and investment themes.
- We believe credit is the best indicator for the direction of interest rates, which in turn drives asset prices.
- We seek to identify long-term global trends and invest in asset classes we feel will appreciate as these trends unfold. We invest in other positions over shorter cycles when conditions are favorable.
- We choose Funds that we expect to best express these views, focusing on the underlying holdings and exposure of each Fund and its liquidity.
