*since inception (1/1/2015) based on monthly gross returns

Risk Reward

Blended global multi-asset strategy comprised of "Fundamental" and "Rules-Based" Tactical solutions seeking growth and income with a focus on downside protection

We focus on fundamental and technical analysis consisting of multiple time period trends

We review risk, positions, and opportunities daily

- We base decisions upon fundamental credit driven research that supports our long- term secular views and investment themes.
- We believe credit is best fundamental indicator for the direction of interest rates, which in turn drives asset prices.
- We seek to identify long-term global trends and invest in asset classes we feel will appreciate as these trends unfold.
- We incorporate trend following equity and high yielding fixed income solutions relying on rules-based indicators to attempt to mitigate drawdowns.
- We invest in either ETFs or mutual funds to gain exposures to a blended multi-asset strategy.

Donoghue Forlines is an SEC registered investment adviser. SEC registration does not imply a certain level of skill or training. The firm was founded in 1986 to provide professional investment management services to individuals, corporations, and institutions, including trusts, employee benefit plans and retirement plans. Today, Donoghue Forlines' investment committee along with its team of professionals is passionately committed to assisting our advisors in helping them meet their client's investment objectives. The firm's solutions have evolved over the years but have been driven by a strong conviction that the "buy and hold" approach is not sufficient to help our advisors meet their clients' objectives of preserving and growing their wealth along with meeting sustainable income needs.

125 High Street Suite 220 Boston, MA 02110 (800) 642-4276 advisorrelations@donoghueforlines.com www.donoghueforlines.com

The Donoghue Forlines Growth & Income Portfolio Composite was created January 1, 2015.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Individual portfolio returns are calculated on a daily basis. Cash flows are weighted according to the time they are available to invest during the period using the Time Weighed Return method. Returns for the subperiods are geometrically linked to obtain the portfolio's monthly return.

Composite returns are calculated by asset-weighting the individual portfolio returns using beginning-of-period values and are calculated monthly in U.S. dollars. These returns represent investors domiciled primarily in the United States. Proxy positions might be held in place of composite holdings at some third-party model manager providers. Past performance is not indicative of future results. The calculation and presentation of performance has not been approved or reviewed by the SEC or its staff.

Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. For a compliant presentation and/or the firm's list of composite descriptions, please contact 800-642-4276 or info@donoghueforlines.com.

Fee Schedule

The investment management fee schedule for all portfolios is: Client Assets = All Assets; Annual Fee % = 0.00%. Actual investment advisory fees incurred may vary and should be confirmed with your financial advisor.

Net 3% Returns

For all portfolios, net 3% returns are presented net of a hypothetical maximum fee of three percent (3%). Actual fees applicable to an individual investor's account will vary and no individual investor may incur a fee as high as 3%. Please consult your financial adviser for fees applicable to your account.

The DJ Moderately Conservative Index is a portfolio index that aims for a moderate risk investment strategy by combining stocks, bonds, and cash, with a risk level that is 40% of the global securities market. It is part of the Dow Jones Relative Risk Indices family and seeks to provide a balance of capital growth and income. The specific mix is determined by monthly rebalancing to maintain the target risk level.

Index performance results are unmanaged, do not reflect the deduction of transaction and custodial charges, or the deduction of a management fee, the incurrence of which would have the effect of decreasing indicated historical performance results. You cannot invest directly in an Index. Economic factors, market conditions and investment strategies will affect the performance of any portfolio, and therefore are not assurances that it will match or outperform any particular benchmark.
